

Pooling Harness Sets

For blood and blood components

- Designed for the collection, storage, transport, separation, and administration of blood and blood components.
- The harness sets can be used to pool:
 - Plasma for therapeutic apheresis
 - Whole blood platelets or cryoprecipitate
 - Blood components into transfer bags

Benefits

- Single-use spikes reduce cross contamination risks
- Decreased product preparation time due to reduced repetitive motions
- Decreased risk of splashback

Standard Applications

Designed for the collection, storage, transport, separation, and administration of blood and blood components

Other Blood Processing Solutions

Charter Medical offers additional solutions such as aliquot bag systems, blood transfer bags, cryogenic storage containers, neonatal syringe sets, platelet sampling sets, and plasma/fluid transfer solutions
